

WASHINGTON STATE LIFE SCIENCES DIRECTORY

Bringing You a World of Business!

Washington State Overview

In the northwest corner of the USA, Washington State is a land of beauty, diverse cultures and some of the most innovative businesses on the planet. Our geographical location puts us in the center of the globe—serving as a convenient hub to markets in Asia, Europe and Latin America.

Washington State is home to small family-owned businesses, entrepreneurial start-ups as well as world-renowned companies including Microsoft, Boeing, Amazon.com, Starbucks and Amgen. The quality and diversity of our products and services are world class, making Washington State an ideal partner for meeting all of your business needs.

Washington State Life Sciences

Washington State is recognized as a center for global health with promising biotechnology companies and medical device technology. The Life Sciences industry in Washington State is supported by prominent research institutions combined with the State's strength in technology and entrepreneurial spirit.

Washington State is at the forefront of new technology research development.

Message from Washington State

The State of Washington is committed to promoting trade, especially through our overseas offices in China, Japan, Korea, Mexico, Germany and Taiwan. It is the job of Washington State Department of Community, Trade and Economic Development (CTED) to connect overseas companies to the right business partners in our State. We hope that you will find this directory as a helpful resource to identify potential partners in Washington State.

Disclaimer: This directory is not a complete listing of Washington companies in the Life Sciences Industry. We have tried to be as accurate as possible in compiling the directory, but names may have changed since going to print. The State of Washington does not guarantee or endorse these companies.

Please contact Washington State German Office for any inquiries about these listings and the Life Sciences Industry of Washington State.

BIOTECHNOLOGY

●3Netics Corporation

Design engineering company

www.3netics.com

3Netics Corporation's core technology involves ink-jet printing of liquids for applications in biotechnology. PicoSpot® DNA Synthesizer (patent pending) is capable of printing thousands of custom compounds onto a proprietary microscope slide. For other ink-jet printing applications, 3Netics offers a line of PicoSpot® Printers capable of printing onto any flat substrate. The single and multiple nozzle print heads under development by 3Netics are offered as components to OEM's for their own dispensing designs. We also offer a full line of liquid level sensors and automatic filling products.

●Amnis Corporation

Speed imaging and analysis of cells in flows

www.amnis.com

Amnis' ImageStream 100 is a biological cell analysis platform capable of simultaneously acquiring six quantitative high resolution digital microscopic images of each cell using three different forms of microscopy: brightfield, darkfield, and fluorescence. Each cell is imaged "on the fly" as it flows through the instrument in fluid suspension. The ability to image cells in flow in this manner is unique to the ImageStream platform, making it a breakthrough technology with no equivalent in the marketplace for the study of blood, fine needle biopsies, and other cell samples that are in suspension due to their biological nature, the method by which they are obtained, or the protocols under which they are probed and studied. Amnis' customers are academic and commercial research institutions that depend on cell analysis for basic life science and clinical research

●Amplicon Express, Inc.

BAC and cDNA library specialists

www.ampliconexpress.com

Amplicon Express is a provider of high-quality BAC Libraries, cDNA Libraries and DNA Sequencing Services with thousands of satisfied clients all over the world. Our employees have constructed over 5550 BAC Libraries, numerous cDNA Libraries, and thousands of DNA sequencing reads since our inception in 1996. Our Custom BAC Libraries have average insert sizes greater than 120 kb and recombinant clone rates greater than 97%. Amplicon Express provides high-quality custom plasmid and phagemid cDNA Libraries. We also specialize in Shotgun Library and Whole Genome Library construction.

●Astarte Biologics, LLC

Human immune cells and recall antigens

www.astartebio.com

Astarte Biologics develops, markets and sells human immune cells and recall antigens for research use. Our current products include peripheral blood mononuclear cells (PBMC) and purified human monocytes. These are tested to assure that they function as expected and information specific to each blood donor is provided to help researchers select the product that best meets their research needs. This quality testing is unique among the providers of human immune cells. The information provided by Astarte Biologics saves scientists the time they would normally spend testing blood donors.

Proteins (antigens) commonly targeted by the immune system are also sold by Astarte Biologics. Additional products for use in cell-based assay systems are being developed. Astarte Biologics is seeking life science distributors capable of successfully marketing our cell products.

●Belli Cosmetics

Body care treatment for lifestyle of motherhood

www.bellicosmetics.com

Belli is a physician-formulated, luxury skin care line specifically created to address the common skin care concerns of early pregnancy and early motherhood. Company is looking for distributors in Germany. It is the first line to offer a pampering collection of medically sound skin care and lifestyle therapy, promoting beauty, comfort, safety, and wellness.

●Bioniche Animal Health USA, Inc.

Biopharmaceutical company for human and animal health markets

www.bioniche.com

Bioniche Animal Health USA, Inc is now poised for a new level of growth, with an expanded global presence, and a portfolio of products and technologies in development that promises to have a profound impact on the converging world of human and animal health. Effective therapies for bladder cancer and potentially other cancers; a cattle vaccine to help prevent E. coli O157:H7 infection; technologies to improve reproduction and potentially replace the use of antibiotics in livestock: these are key areas of strategic focus for Bioniche.

●Biopol Laboratory Inc.

Manufacturer of biological products

website: n/a

Biopol Laboratory Inc. processes molds, pollen and other allergens for use in allergy treatment and diagnostic products.

●Cell Systems Corporation

Tools for cell biology

www.cell-systems.com

Cell Systems Corporation has, since 1991, focused on developing and manufacturing standard research tools for the science of cell biology. Cell Systems manufactures as a "gold" standard normal primary CSC Certified™ cells. Using as a reference these cell lines, ACBRI formulated and qualified complete media and reagents appropriate for use as delivered with >90% of cell types in use today.

●Cellcyte Genetics, Inc.

New cord blood stem cell therapies

www.cellcyte.com

CellCyte Genetics is dedicated to bringing innovative proprietary therapeutic products and regimens to patients. CellCyte was founded in 2004 with a strategic and highly focused plan to combine proven technologies that through refined bioengineering, have the potential to become a next generation of patentable technology; in particular, for new cord blood stem cell therapies, procedures and new drug discoveries. This approach allows CellCyte to greatly advance research, broaden its intellectual property base and mitigate many of the risks and costs in clinical development.

●Chondrex, Inc.

Provider of high quality reagents

www.chondrex.com

Chondrex, Inc. provides a variety of high quality reagents and consulting services for arthritis and inflammatory research, under the trade name Arthrogen-CIA®. We specialize in the biochemistry and immunology of collagen and collagen-related materials, as well as arthritis research models (authentic collagen-induced arthritis model and newly developed monoclonal antibody-induced arthritis model - allows for the testing of compounds within 1 - 2 weeks instead of months).

●Columbia Nutritional Service, Inc.

Contract manufacturer

www.columbianutritional.com

Columbia Nutritional Service, Inc. (CNSI) is a contract manufacturer that specializes in tableting, powder blends, bulk and bottled finished products, gelatin and vegetable hard-shell capsules. CNSI is a registered by the United States Food and Drug Administration as a Bioterrorism Act of 2003 registered facility.

●Creative Gene Therapeutics (CGT) Corporation
Cancer therapeutics and vaccine

website: n/a

CGT Corporation was founded on the principal of conducting cell and gene therapy. Company is looking to establish a development partnership with European pharmaceutical companies and partner with institutional investors.

●DermaSystems Inc.

Dry skin protection

www.proKera.com

Developed by a dermatologist & a pharmacist, the ProKera line of dry skin care products is compounded according to good manufacturing practices and contains only ultra-pure US Pharmacy-grade ingredients. ProKera products contain no colors, fragrances, mineral oil or lanolin and are not tested on animals. ProKera is a highly effective dry skin lotion containing 5% glycolic acid that provides long-term moisturizing & protection for problem dry skin.

●Golden Bridge International, Inc.

Antibodies, antigens and biochemical reagents

www.gbi-inc.com

Golden Bridge International, Inc. (GBI, Inc.) has been in business of marketing and selling life science products since 1993. Our products include Neonatal screening, Cytokines, Cancer research, Hormones, Autoimmune Diseases, and Drugs of Abuse. We represent over 20 leading biotechnology manufacturers. These companies make many types of laboratory products including antibodies, antigens, biochemical reagents as well as related laboratory equipment. GBI has many advantages in the global marketplace including a highly competent sales and marketing force, know-how on overcoming the many barriers to international business and the markets.

●Greenland Inc.

Herbal beverages

www.greenland-usa.com

Greenland, Inc. is a manufacturer and developer of herbal beverages for daily dietary supplement. Our company was founded in Seattle, WA, USA in 1993. The herbal drink is all natural and has been enjoyed and praised by numerous customers and patients around the world.

●Harmony Soap Works

Natural soaps

www.harmonysoapworks.com

Harmony SoapWorks is a family owned business located in a small beach community on Washington's Long Beach Peninsula. We make our soap "from scratch" using only the best ingredients and we have been doing this since 1997. We create our formulas with your skin in mind-after all, it is all that you have between you and the tough world.

●HollisterStier Contract Manufacturing

Contract manufacturing services

www.fill.hollisterstier.com

HollisterStier Contract Manufacturing focuses on parenteral contract manufacturing services. Our capabilities include aseptic processing of lyophilized and liquid dosage forms at commercial and clinical scale. As a producer of sterile protein extracts since 1921, HollisterStier has an extensive background in fill/finish, lyophilization and small lot manufacturing. New services and personnel continue to be added to accommodate the growing contract manufacturing industry. An integral part of the contract manufacturing process includes HollisterStiers project management teams. HollisterStier employees work as strategic partners, making sure projects are completed to exact specifications. The HollisterStier facility is designed for multi-product operations. The facility manufactures products that are regulated as biologics, drugs, and devices. The products range from Phase I clinical trial material to commercially available products.

●Kent Laboratories, Inc.

Production of polyclonal antibodies, radial immunodiffusion kits

www.kentlabs.com

Since 1974 Kent Laboratories has been a specialist in the production of polyclonal antibodies, radial immunodiffusion kits and conjugated immunoglobulin fractions for manufacturers, universities and laboratories. We were one of the very first to provide the market with these specialized diagnostic tools. Kent Laboratories is an FDA registered facility and all company operations follow current Good Manufacturing Practices (GMP). The quality control program is continually updated to meet and exceed industry standards to ensure product consistency.

●MatriCal, Inc.

Lab instrumentation

www.matrical.com

MatriCal, incorporated in early 2000, has expertise in injection molded plastic products with special emphasis on microwell plates. We also offer state-of-the-art solutions for automated compound management and storage, high throughput sonication, and high throughput thermal cycling. MatriCal takes pride in individual customer care. If at any time a customer can't find the product or tool they need, MatriCal will sit down with them and help create a quality, workable solution that fits their needs.

As our overseas market grows, MatriCal is looking to find quality suppliers that can help us penetrate the life sciences consumables market in areas of HTS, HCS, protein crystallography and genomics.

●Ondine Biopharma Corporation

Non-antibiotic therapies for bacterial and viral infections

www.ondinebiopharma.com

Ondine Biopharma Corporation is developing an innovative laser-activated approach to broad-spectrum disinfection. Antibiotic resistant microorganisms are

flourishing world wide, prompting an intensive search for new antimicrobials that do not induce bacterial resistance. Ondine's patented PhotoDynamic Disinfection (PDD) technique targets bacteria for rapid destruction without damage to human host cells in vitro and without encouraging the formation and spread of bacterial resistance. Ondine expects to first introduce this innovative technology into the multi-billion dollar periodontal disease market.

● **PlasmaLab International**

Human plasma

www.plasmalab.com

PlasmaLab International (PLI) was established in 1985 when its founders sensed an increased need in the biomedical industry for a reliable, cost effective source for high quality diagnostically relevant human plasma. Since that time, PLI has become a major supplier of an expanding array of specialized human in-vitro products for distribution to diagnostic, regulatory, and research facilities worldwide. The company maintains a facility which is licensed by the U.S. Food and Drug Administration (FDA) for the collection of source plasma from disease state donors. Quality assurance is our highest priority, and all applicable FDA, Good Manufacturing Practices (GMP), and Clinical Laboratory Improvement Act (CLIA) regulations are strictly followed.

● **Sangretech Biomedical LLC**

Cellular therapies for cancer

website: n/a

Sangretech Biomedical's mission is to provide patients with more and better treatment options by researching, developing, and commercializing cellular therapies for cancer and other medical conditions

● **Scolr Pharma, Inc.**

Drug delivery technology

www.scolr.com

SCOLR™ Pharma is a specialty pharmaceutical company engaged in the development and licensing of its Controlled Delivery Technology (CDT®). The CDT platform consists of several patented oral drug delivery technologies for prescription, OTC and nutritional compounds. Partnerships with pharmaceutical and natural products industry companies enable SCOLR Pharma to co-develop new products and to add value and protection to existing product franchises.

● **Signature Genomic Laboratories**

Molecular cytogenetic diagnostic laboratory

www.signaturegenomics.com

Signature Genomic Laboratories, LLC (Signature) was established as a partnership between Signature Genomic Services, Pathology Associates Medical Laboratories and Sacred Heart Medical Center. Signature's global headquarters is located in Spokane, Washington where it operates a state-of-the art molecular cytogenetic diagnostic laboratory. Signature's mission is to provide outstanding genetic services using the latest diagnostic technologies

● **Sharpe Mixers**

Mixers for pharmaceuticals and biotechnology

www.sharpemixers.com

Sharpe Mixers has dedicated over 50 years to liquid mixing equipment. Our equipment meets or exceeds the strict regulations governing the pharmaceutical and biotechnology fields.

● **SMB2000**

Speaker Pillow

www.smb2005.com

SPEAKER PILLOW is a therapeutic pillow with a head support, neck support, and miniature speakers installed. Because music is soothing to the spirit and relaxing, this product allows you to listen to music, audio books, or specially recorded tapes while resting. It may offer an alternative to television or other self-care therapies. While resting, relaxing, and listening you can concentrate on what you hear instead of how or what you are feeling. It's a wonderful solution to those moments of sleeplessness.

● **Solomon Park Research Laboratories**

Neurobiological research

www.solomon.org

Solomon Park Research Institute is a non-profit foundation specializing in neurobiological research. The institute was founded and incorporated in 1985. Initial funding for the Institute was provided by the Amyotrophic Lateral Sclerosis Society of America (ALSSOA) and subsequent research has focused largely on this disease. The Institute has also received a grant from the Amyotrophic Lateral Sclerosis Association (ALSA) and most recently has received a bequest from the Wesley and Frances Johnson estate for conducting research into ALS. This bequest has allowed us to aggressively pursue our research into ALS by expanding the institute into new laboratory space and purchasing much needed equipment for this research

● **Tessera, Inc.**

Early detection of prostate and colon cancers

www.tesserainc.com

Tessera, Inc is a biotechnology company dedicated to developing new, cutting-edge diagnostic products for the early detection of prostate and colon cancers. The company was incorporated in Washington State in 2000. Using new, patented technology discovered by leading scientists from Johns Hopkins University's School of Medicine, (Baltimore, Maryland) and from the University of Pittsburgh, (Pittsburgh, Pennsylvania), Tessera is developing diagnostic tests that are many times more sensitive and more accurate than other methods currently used. A funded research program with Dr. Robert Getzenberg is currently underway at the Brady Urological Research Institute at Johns Hopkins to develop antibodies for the detection of early-stage prostate cancer and colon cancer.

DENTAL

● **Myotronics-Noromed, Inc.**

Neuromuscular dentistry

www.myotronics.com

Myotronics manufactures a full range of products for the Neuromuscular Dentist. The K7 Evaluation System is a computer-based system for three dimensional jaw tracking, surface electromyography and temporomandibular joint sound study. The J5 and J4 Myomonitors and BNS-40 Home Treatment units are muscle stimulators used to create a physiologically relaxed state of the muscles of mastication — in the office and at home. Myotronics prides itself in the quality and after-sale support of our products. Myotronics products are utilized in clinical practices and in research settings in dozens of countries throughout the world. The products are used prominently in research projects in many

international universities. Accredited continuing education programs are co-sponsored by Myotronics in both the U.S. and Internationally.

● **Pascal Co. Inc.**

Dental products for the professional and consumer
www.pascaldental.com

Pascal Company, Inc. manufactures innovative products for the dental professional. Pascal offers comprehensive product lines, which include Infection Control, Tissue Management and Preventive products.

EQUIPMENT & SUPPLIES

● **Brooks Rand LLC**

Analytical equipment and services
www.brooksrand.com

Brooks Rand LLC specializes in analytical services and products for trace level metals analysis and metals speciation. We offered the world's first commercially available mercury analyzer based on atomic fluorescence, and associated analytical services. Brooks Rand quickly established an international reputation as the technology leader in mercury analytical products and services. More recently, we have developed new technologies including new processes and instrumentation for measuring mercury in coal-fired power plant flue gas and for rapid-response field screening of mercury contamination. Brooks Rand also extended its R&D efforts in the environmental analytical realm beyond mercury to develop improved procedures for arsenic and selenium analysis and speciation.

● **KC Multi-Ring Products, Inc.**

Sealing system
www.kcmultiring.com

Achieve predictable, reliable, repeatable, measurable and verifiable joint performance.

● **Magic Wheels, Inc.**

2-speed manual wheel chair
www.magicwheels.net

The Accelerator, an all mechanical wheelchair hubs use a patented 2-gear drive technology specifically designed for manual wheelchairs. The Accelerator can be adapted to fit most manual wheelchairs. It has 10 different handrim options which allow for use on both 2 and 4 speed models. Each wheel has an easy-to-use shifting mechanism that allows users to switch gears with minimal effort. The Accelerator employs 2 gears: high and low. In high gear, the Accelerator moves like a normal wheelchair wheel. Shifted into low gear, your wheelchair becomes twice as easy to push and can be used to easily climb ramps, hills, door jams and any other types of incline. Low gear is also great for navigating thick carpet, uneven grass or gravel and most other uneven terrain. Additionally, you can use The Accelerator's braking feature while in low gear. This braking feature allows for 50% less force than is usually required to stop. This feature substantially increases the braking power you have with no extra strength required.

● **Sterlitech Corporation**

Laboratory equipment
www.sterlitech.com

Sterlitech Corporation is one of the world's largest producers of inorganic membranes, including the proprietary Sterlitech™ Silver Metal Membrane. Our products, including the Sterlitech™ HP4750 Stirred Cell,

are manufactured under strict quality controls and deliver industry leading performance for projects that require absolute precision in measurement and results. The filtration products we manufacture and market can be used in reverse osmosis, nanofiltration, ultrafiltration or microfiltration and are used in a variety of industries, including occupational health and safety, petrochemical, fossil fuels and biotech. Sterlitech's specific goals in overseas markets are to expand our sales to end users, OEMs and distributors.

● **TiLite/Tisport**

Titanium wheelchairs
www.tilite.com

TiLite evolved from the simple idea of developing a superior class of manual wheelchairs that would combine orthoses-like customization with the most advanced material. We felt that these attributes would help users remain independent longer, experience reduced body stress, and incur fewer posture-related problems. TiLite is the only wheelchair company that is obsessively dedicated to improving the mobility of wheelchair users. The result is a line of adult, pediatric and sport titanium wheelchairs that are truly 21st century wheeled orthoses.

● **Vectra Fitness, Inc.**

Fitness equipment
www.vectrafitness.com

Strength training is an important component to achieving complete health and fitness. Vectra Fitness has been the leader in the design of user-friendly, multistation weight machines since 1987. A Vectra multistation gym provides more comprehensive upper and lower body exercises than any other home strength products. But most importantly, no other product offers such a simple, efficient and comfortable workout. Vectra allows you to quickly and easily integrate full body strength training into your home exercise routine.

FACILITIES & CONSTRUCTION

● **Advanced Technology Construction**

Facility construction
www.atcclean.com

Advanced Technology Construction builds clean environments to exacting standards for biomedical and pharmaceutical firms, hospitals and other medical organizations. When you choose ATC for turnkey cleanrooms, laboratories or cGMP facilities, you gain immediate assurance of the desired outcome: FDA compliance and validation guaranteed.

LEGAL SERVICES

● **Seed Intellectual Property Law Group**

Legal assistance in all areas of intellectual property
www.SeedIP.com

Seed IP specializes in providing legal assistance in all areas of intellectual property: patents, trademarks, copyrights, trade secrets, licensing and litigation. Since our founding in 1962, Seed IP has evolved into one of the Pacific Northwest's leading IP firms. Our valued clients

represent a full spectrum of business and industry, from multinational corporations to start-up companies to individuals. We are entrusted with the critical mission of adding value to their innovations and protecting their intellectual assets. Because we consistently honor that trust with our diligence, creativity and expertise, Seed IP enjoys many long-term client relationships.

MEDICAL EQUIPMENT & DEVICES

●Advanced Imaging Technologies, Inc.

Holographic ultrasound

www.nextwaveimage.com

Advanced Imaging Technologies (AIT) of Richland, WA is developing and commercializing the first truly new soft tissue imaging technique to be launched in the last 25 years. Holographic Ultrasound™ represents a novel imaging modality that couples through-transmission ultrasound with the science of acoustical holography. Unlike traditional ultrasound, which relies on reflected sound waves to generate images, Holographic Ultrasound, a proprietary technology, takes advantage of the diffractive properties of sound waves as they pass through tissue to create detailed images of the soft tissue structures of the body.

●Advanced Medical Inc.

Pre-owned lasers and used cosmetic equipment

www.hotlasers.com

Advance Medical Inc. offers a broad range of pre-owned equipment from top of the line manufacturers in cosmetic medical lasers. All products pass an extensive check list before they leave the warehouse and are patient ready.

●A-M Systems

Pulmonary and respiratory supplies

www.a-msystems.com

Established in 1976, A-M Systems, Inc. manufactures a wide range of cost-effective medical supplies for use in respiratory therapy and pulmonary function testing. Our PFT Kit contains all of the disposables required for testing in a single package, including a noseclip, viral/bacterial filter, and two mouthpieces. A-M Systems also offers: disposable plastic-coated Mouthpieces that do not adhere to your patient's lips; Viral/Bacterial Filters that prevent the spread of pathogens between patients; white plastic Noseclips with soft nose pads for patient comfort; and a line of 3-liter Calibration Syringes that accurately calibrate a variety of spirometers. Smooth Interior Tubing, Absorbents, Chart Paper and Pens, Breathing Bags, Peak Flow Meters, Face Masks, and Nasal Cannula compliment A-M Systems line of product offerings. For a complete listing of A-M Systems Products, a complimentary catalog may be requested from Customer Service, or view them on the Internet for product information and technical support via email.

●Ameritek USA

Rapid diagnostic devices

www.ameritek.org

AmeriTek specializes in manufacturing advanced, rapid in-vitro immunodiagnostic and clinical reagent tests. AmeriTek is licensed by the FDA as a medical establishment and ships high quality medical diagnostic test kits world-wide. Products include one-step rapid

tests and Microwell ELISA Tests (cardiac markers, fertility etc.)

●Best Use Corp.

Used medical equipment and scientific laboratory equipment

www.bestuse.com

BestUse offers used medical equipment from Pacific Northwest hospitals and used scientific equipment from this region's scientific research laboratories. Refurbished. Warranted. Autoclaves, C-Arms, Centrifuges, Fume Hoods, HPLC, Monitors, Spectrophotometers, X-Ray and more.

●BioNeuronics Corporation

Medical device company for epilepsy

www.bioneuronics.com

BioNeuronics Corporation is an early stage medical device company developing revolutionary technology for the management and treatment of epilepsy.

●Cadwell Laboratories Inc.

Diagnostic and monitoring products for neurophysiology

www.cadwell.com

Cadwell Laboratories Inc. is an industry leader in developing innovative diagnostic products for the neurophysiology market since 1979. Easy II PSG/EEG is a multi-tasking digital PSG system that includes a 32-channel digital Easy II EEG system. This multi-modality product can run in an EEG lab during the day and move to the sleep lab at night.

●Cardiac Sciences Corporation

Diagnostic and therapeutic cardiology products

www.cardiacscience.com

Cardiac Science Corporation provides a full spectrum of diagnostic and therapeutic cardiology products and services. We develop, manufacture and market our products under the Burdick®, Powerheart® and Quinton® brand names. We offer products for the following markets, cardiac stress testing, ECG devices, Holter monitoring, automated external and therapeutic monitoring defibrillators, data management systems, cardiac rehabilitation management software, rehabilitation treadmills, supplies and accessories for all our products.

●DE Hokanson

Non-invasive vascular instruments and accessories

www.deh-inc.com

Hokanson has been serving the vascular community with high quality Dopplers, plethysmographs, cuff inflators and specialty vascular cuffs for over 30 years. Hokanson manufactures a full line of non-invasive vascular instruments for segmental pressure exams, segmental Doppler and pulse volume recordings, venous occlusion plethysmography, and many other specialty vascular examinations.

●E-M Probe Technologies

Non-invasive vascular instruments and accessories

www.em-probe.com

EPT manufactures and sells a highly advanced healing technology involving nanosecond pulsed electromagnetic field technology which has been extensively studied by NASA and is currently in use by DOD in Iraq. Our technology is the lightest device containing the fastest pulse on the market, an essential component in bio-efficacy with expectations to expand nationally and internationally.

● **Olympic Medical**

Manufacturer of medical equipment and supplies

www.olympicmedical.com

Olympic Medical has been manufacturing professional medical equipment and supplies for over 40 years. Our products are distributed throughout the world to hospitals, clinics and physicians. A diverse product ranging from pediatrics, phototherapy, respiratory, surgical and disinfectants.

● **Oppo Medical**

High quality supports

www.oppomedical.com

Oppo Medical offers an extensive product line of joint supports, belts/slings, bi-elastic supports, bioceramic supports, biomagnetic support, ice and hot therapy products, silicon supports, abdominal supports and hip stabilizers. Company's focus is on understanding the rehabilitation market and meeting the needs of customers.

● **Pacific Bioscience Laboratories**

CLARISONIC™ Skin Care Brush

www.clarisonic.com

Pacific Bioscience Laboratories is the developer of the CLARISONIC™ Skin Care Brush. The CLARISONIC brush uses proprietary sonic technology and a two-way oscillating brush system to safely, deeply cleanse and clarify the skin.

● **Peripheral Vision, Inc.**

Manufacturer/supplier of parts

www.peripheralvisions.com

Peripheral Vision Inc., is the world's leading manufacturer of Perphormax™ brand parts, consumables, pm kits, lamps, probes, and electrodes for Hitachi, Beckman and Ciba-Corning chemistry analyzers.

● **Philips Medical Systems**

Diagnostic ultrasound and cardiac defibrillators

www.philips.com

Philips offers a robust portfolio of medical systems. The goal of each product is clear, faster and more accurate diagnosis and treatment. Our product line includes best-in-class technologies in X-ray, ultrasound, magnetic resonance, computed tomography, nuclear medicine, PET, radiation oncology systems, patient monitoring, information management and resuscitation products. We also offer a wide range of services. Including but not limited to training and education, business consultancy, financial services and e-care business services.

● **ReNu Medical**

Medical device reprocessing

www.renumedical.com

ReNu Medical was founded in 2000 as an FDA-registered, contract high level disinfection (HLD) reprocessor of non-critical and semi-critical medical devices for hospitals and healthcare facilities.

● **Spacelabs Medical**

Patient monitoring system

www.spacelabs.com

Spacelabs Medical's systems support time-saving, informed decision-making for care teams in critical care, emergency, and perioperative areas. Developed in partnership with caregivers, Spacelabs' systems focus on making the most efficient use of valuable staff time and on improving standards of patient care. Integrated solutions include wired and wireless networks, clinical information connectivity, ambulatory blood pressure (ABP) monitors,

and medical data services.

● **Surgi Mark, Inc.**

Disposable sterile single use medical products

www.surgimark.com

SurgiMark was founded in 1983, with the mission to design and develop innovative instruments and appliances for the surgical arts. We work in concert with surgeons, nurses, technicians, and engineers from multiple disciplines. We emphasize utility, ergonomics, value, economy, safety, and a relentless pursuit of quality. Our product lines focus on the various suction and drainage needs that face our health care professionals on a daily basis. Each of our products has unique design features that have been awarded many U.S. and International Patents. SurgiMark is fully compliant with FDA and ISO 9000 standards and procedures. Our products are used daily in hundreds of hospitals across the United States as well as the Americas, Europe, and the Pacific Rim nations.

● **Vertis Neuroscience**

Electrical stimulation for lower back pain.

www.pnthealth.com

Vertis PNT(tm) (Percutaneous Neuromodulation Therapy) is a minimally invasive therapy for upper and lower back pain involving the delivery of electrical stimulation to the deep tissues near the spine. The Vertis PNT System has U.S. FDA clearance and a European Union CE Mark. Seeking distributors in Germany.

● **Veterinary Transplant Services, Inc.**

Provider of bone, soft tissue and corneal grafts for animals

www.vtsonline.com

Veterinary Transplant Services is the world's leading provider of bone for transplantation into animals. The Osteo-Allograft™ that VTS provides has the same medical benefits as an autograft while reducing OR time and patient pain. Having both osteoconductive and osteoinductive properties, Osteo-Allograft™ provides the full spectrum of factors needed to promote bone healing. VTS aims to connect with the international veterinary community through distributors of veterinary medical supplies as well as through direct contact with veterinary hospitals and the veterinarians themselves. With a particular focus on contributing to the advancement of medicine and improving the quality of pets' lives, the Company strives to respond to the needs of veterinarians worldwide.

● **World Medical Equipment, Inc.**

Refurbished and new surgery equipment

www.worldmedicalequip.com

World Medical Equipment, Inc. offers the highest quality refurbished medical equipment at competitive prices. We completely disassemble each piece of equipment and rebuild it to the original equipment manufacturer's specifications, replacing parts as needed. Our refurbished equipment works and looks like new but costs 40 – 60% less than new. All equipment is backed by complete warranties. Our parts department can supply OEM quality parts and consumables for your major medical equipment needs and our biomedical staff and service technicians can answer any questions you might have. World Medical Equipment is seeking reputable distributors/service companies in various countries to represent our high quality line of products and to assist in warranty support for our products.

OTHERS

CONSULTING

●Bureau Veritas

Consulting services

www.us.bureauveritas.com/

Bureau Veritas, founded in 1828, is a global organization specializing in quality, health, safety, environment and social accountability (QHSE & SA). We are a worldwide leader in certification, conformity assessment, training, and consulting services. Our mission is to assist our customers in QHSE & SA management of their assets, products or services, systems, and employees. With a global presence and extensive recognition and accreditation from the world's major national and international organizations, Bureau Veritas serves customers – commercial and public entities alike – across a wide variety of industries. Our operations cover 140 countries and include more than 600 offices and laboratories. With over 20,000 employees, Bureau Veritas serves more than 200,000 customers all over the world, from local companies and municipalities to the largest state and national agencies and multinational corporations.

DRUG DEVELOPMENT SERVICES

●Ockham Development Group Inc.

Clinical development services

www.ockham.com

Privately held drug development partnering company headquartered in Cary, North Carolina (offices in Philadelphia and Tacoma, Washington), composed of three separate but closely integrated service groups: Ockham Development - Clinical development services and experience in a wide range of therapeutic areas: Pre-IND Planning, FDA Meetings, Regulatory, Medical Writing, Data Management, Project Management, Medical Monitoring and Safety, Clinical Monitoring, Biostatistics, High-Level Consulting. Ockham EDGE - National and international consortium of drug development experts and organizations: Pre-Clinical Planning / Testing, Product Portfolio Analysis, Technology Evaluation, Financial Modeling, Scientific Oversight, Stand-Alone Consulting, Surrogate Management Infrastructure, Compound Due Diligence, Drug Development Planning, Protocol Development, Proposal Due Diligence and Support, Project Team Orientation and Training, International Regulatory Representation, DSMC Representation and Management. Ockham Ventures - A business venture group focused on drug development partnering that allows Ockham to enter into risk-sharing and joint development partnerships with customers: Risk-Sharing, In-/Out-Licensing, Technology Brokering, Raising Capital, Venture Capital.

ECONOMIC DEVELOPMENT

●Washington Technology Center

Economic development agency

www.watechcenter.org

Washington Technology Center (WTC) is a statewide economic development agency focused on technology and innovation. WTC channels state, federal, and private resources to help companies develop and commercialize new products and technologies.

WTC works across all industries and regions. We help maximize and leverage the investment Washington State is already making in university science and technology. No other organization is better at directly and actively maintaining Washington State as a leader in technology

FLUID-TRANSFER COMPONENT MANUFACTURER

●Upchurch Scientific, Inc.

Fluid handling technologies

www.upchurch.com

Founded in 1975, Upchurch Scientific, Inc. is ISO 9001:2000 certified and leads the industry leader in manufacturing fluid transfer components and subassemblies for the analytical, biotechnology and diagnostic markets. Upchurch Medical™, a division of Upchurch Scientific, Inc., was formed in 2004 to serve specific needs of the medical device market. Together, we offer standard and custom injection molding, extrusion and machining - specializing in high-performance engineering thermoplastics and corrosion-resistant metals. Materials include: PEEK™, PEEK-CLASSIX™, Teflon® PFA/HP/HP Plus/FEP, Tefzel®, polysulfone Udel®, polyethersulphone [Radel®A], polyphenylsulfone (Radel R), ECTFE (Halar®), PEI (Ultem™), stainless steel and titanium. Upchurch Scientific has more than 15 years experience building injection molds for a wide variety of exotic resins. As a result, we have the world's largest selection of standard and custom molded fittings. We also lead the industry in precise, close-tolerance melt extrusion of high performance polymer tubing in standard and nonstandard sizes and lumens.

RESEARCH SYSTEMS & TOOLS

●Rosetta Biosoftware

Development of informatics solutions

www.rosettatabio.com

Rosetta Biosoftware accelerates drug discovery and development efforts and have a competitive advantage in this market by offering our customers scalable, customizable informatics solutions that adapt to their needs. We have the scientific expertise to effectively complement our customers' internal informatics groups or serve as an informatics resource. In the overseas market, we seek all pharmaceutical, research, and academic institutions engaged in gene expression or protein expression research. Our products and services can scale to fit any-sized institution.

●VizX Labs

Bioinformatics

www.vizxlab.com

VizX Labs addresses the swiftly growing demand to understand the vast quantities of genomic data being created by pharmaceutical companies, biotechnology firms, and academic research institutions. The company's GeneSifter product is used by customers in eleven nations in a gene expression (primarily microarray) software market that is expected to grow from less than \$100 million today to nearly \$800 million by the close of the decade. Biology software markets (including genotyping and protein data) are expected to reach nearly \$3 billion in 2010. The GeneSifter products integrate data management, analysis, and scientific understanding in one accessible system that makes its users far more productive than any other software in the field. It was

developed by researchers for researchers, is revised continually, and is supported by outstanding customer service. GeneSifter specifically addresses problems biologists face and helps them understand the biology behind their data. Its ability to drastically increase productivity has won high praise from its users, who hail from institutions such as Harvard, Johnson & Johnson, and even the United States Army.

SUPPLEMENTS

●Northwest Natural Products

Vitamin Supplements

www.nwnaturalproducts.com

With 20 years of researching, formulating and manufacturing vitamin supplements, Northwest Natural Products is nationally recognized for all-natural ingredients, superior taste and user-friendly delivery systems such as gummy bears, soft chews, malted milk balls and chewable tablets.
